	Appendix B: Allocation Factors	7

1 Introduction

- 1.1 This note is addressed to the Lord Chancellor in his capacity as the scheme manager of the New Judicial Pension Scheme 2015 (NJPS 2015), which came into force from 1st April 2015 by the Judicial Pension Regulations 2015 (“the Regulations”).
- 1.2 This document sets out the actuarial guidance on the calculation of the additional dependant benefit which is created when members choose to allocate part of their annual pension to a dependant, under Regulation 78 of the Regulations.
- 1.3 The tables in Appendix B sets out the factors required for determining benefits when members choose to allocate part of their annual pension to a dependant.
- 1.4 Regulation 81 relates to determining the amount of pension payable to a nominated beneficiary on the member's death from the pension allocated under the election.
- 1.5 We have assumed that this pension payable to the nominated beneficiary is calculated at date of allocation, not at the date of death – it appeared to us that either approach may be possible under the regulations.
- 1.6 Allocation factors are the responsibility of the scheme manager of the NJPS, having consulted with the Scheme Actuary, under Regulation 81(b). This document forms GAD's guidance to the scheme manager. The scheme manager is responsible for these factors and should therefore determine the appropriate next steps including if and when any revised factors should be distributed to, and implemented by, the administrators.
- 1.7 Regulation 81(b) states that the amount of pension payable to the nominated beneficiary should be determined having regard to the amount of pension allocated under the election and the beneficiary's age and gender. We have also had regard to the member's age and gender when calculating these factors.
- 1.8 The remainder of this introduction contains:
 - > details of the implementation and future review of this guidance,
 - > statements about third party reliance and liability
- 1.9 In the remainder of this note:
 - > the second section describes the allocation of pension calculation
 - > the third section provides an example calculation
 - > Appendix A sets out some important limitations
 - > Appendix B contains the relevant factors

Implementation and review

- 1.10 Allocation of a members' pension is permitted under Regulation 78 of the Regulations. After allocation occurs the member's retirement pension is reduced by the allocated amount, and an additional dependant pension is created as set out in Regulation 81.
- 1.11 This note covers allocations to adult dependants and children.
- 1.12 The following types of cases should be referred to GAD:
- > Cases where a member has reached aged 75
 - > Cases where the member's benefits include a Guaranteed Minimum Pension as part of a transfer in pension to the NJPS (Regulation 78(5) of the Regulations provide a limit on the amount of pension that may be allocated in such cases)
- 1.13 This guidance has been written for pension administrators and assumes some knowledge of general pension terminology, and some familiarity with retirement calculations for the NJPS 2015. Any questions concerning the application of the guidance should, in the first instance, be referred to MoJ.

Use of this note

- 1.14 This note has been prepared for MoJ and can be relied upon by them. We are content for this note to be released to third parties, provided that:
- > it is released in full;
 - > the advice is not quoted selectively or partially; and
 - > GAD is identified as the source of the note.
- 1.15 Third parties may wish to seek their own actuarial advice where appropriate. GAD has no liability to any person or third party for any act or omission taken, either in whole or in part, on the basis of this note.

2 Allocation

General information

- 2.1 Under the NJPS Regulations, a member may elect to allocate a part of their annual pension for the provision of pension after their death to a person who is their spouse, civil partner or other dependant, as set out in Regulation 78(3).
- 2.2 If the beneficiary survives the member, on the member's death the beneficiary becomes entitled to the payment of a pension for life, subject to Regulation 81(3) and Regulation 160 [General prohibition on unauthorised payments].
- 2.3 There are a number of conditions to be met before a member can choose to allocate a part of their pension. This includes but is not limited to the restriction that the member cannot be in receipt of their pension (other than due to partial retirement) at the date that allocation takes place.
- 2.4 Regulation 79 of the 2015 Regulations sets out a number of restrictions on how much pension a member can choose to allocate. Administrators should check that all relevant conditions to make an allocation have been met. This process is not covered in detail in this guidance.
- 2.5 An election to allocate may not be withdrawn, amended or revoked after it has taken effect, even if the beneficiary predeceases the member.
- 2.6 If the member wishes to allocate pension to more than one beneficiary, the member must make a separate allocation in respect of each beneficiary.
- 2.7 It is assumed that after calculations have been carried out, all relevant restrictions on the amount of pension that can be allocated will be checked. This process is not covered in detail in this guidance.
- 2.8 Regulation 101 provides that a surviving adult's pension on death of the member is reduced if the dependant is more than 12 years younger than the member. The factors in this note have been calculated on the basis that the allocated pension payable under regulation 81 to the beneficiary of an allocation election is not included within the definition of the surviving adult's pension, and so would not be reduced under regulation 101.

Calculations

- 2.9 The factors are intended to be used to identify the amount of pension the dependant will receive on the member's subsequent death should the member give up a fixed amount of pension. The amount of dependant's pension secured is calculated by multiplying the amount of pension that the member wishes to give up (allocate) by the relevant factor given in the tables in Appendix B. The appropriate factor for the member's age (down the side of the table) and the dependant's age (across the top of the table) should be used, where age in each case is taken as age in completed years at the date the member's pension is due to come into payment.

Pension increases

- 2.10 Pension increases are payable on the amount of pension actually in payment and so the part of pension surrendered on allocation will not qualify for such increases as part of the member's pension.
- 2.11 The pension secured for the beneficiary as a result of the allocation will, however, be subject to increases in its own right, and it will attract pension increases appropriate to a pension beginning on the same date as the allocation was made.

3 Examples

- 3.1 This Section sets out a worked example to help illustrate how the factors should be applied.
- 3.2 The conditions for allocation and restrictions on amounts which can be allocated are not considered within these examples. These examples are only for illustration on how factors should be used and may not represent actual possible scenarios.

A. Member retiring in normal health allocating to an adult dependant

Member age:	55
Member's gender:	Male
Member's pension at retirement:	£25,000 pa
Pension member wishes to allocate:	£1,000 pa

Dependant age:	46
Dependant's gender:	Female
Appropriate allocation factor:	4.728

Member pension after allocation	£24,000 pa
Additional dependant's pension on member's death due to allocation only: $4.728 \times £1,000$	= £4,728 pa

Appendix A: Limitations

This note should not be used for any purpose other than to determine the amount payable when members choose to allocate part of their annual pension to a dependant in accordance with the regulations cited above.

The factors contained in this note are subject to regular review. Administrators need to ensure that they are using the latest factors, as relevant, when processing cases.

This note should be considered in its entirety as individual sections, if considered in isolation, may be misleading, and conclusions reached by a review of some sections on their own may be incorrect.

This note only covers the actuarial principles around the calculation of the amount payable on allocation. Any legal advice in this area should be sought from an appropriately qualified person or source.

This guidance is based on the Regulations in force at the time of writing. It is possible that future changes to the Regulations might create inconsistencies between this guidance and the Regulations. If users of this guidance believe there to be any such inconsistencies, they should bring this to the attention of the Ministry of Justice. In no circumstances should this guidance take precedence over the Regulations. Administrators should ensure that they comply with all relevant Regulations.

Appendix B: Allocation Factors

Please see the tables that follow (pages 1 -20).
